

Mental Health Liaison Group

March 18, 2003

The Honorable Fortney Pete Stark
U.S. House of Representatives
Washington, DC 20515

The Honorable Jon Corzine
United States Senate
Washington, DC 20510

Dear Representative Stark and Senator Corzine:

The undersigned organizations in the Mental Health Liaison Group strongly support your legislation, the “Medicare Mental Health Modernization Act of 2003.”

Despite the fact that effective treatments exist, Medicare’s current mental health benefit is not meeting the treatment needs of the millions of beneficiaries suffering from mental and emotional disorders. As representatives of the mental health community, we are heartened by your proposal to address these deficiencies.

There are numerous shortcomings in current Medicare policy. Medicare beneficiaries must pay 50% of the cost of outpatient mental health treatment, compared to only 20% of the cost for other outpatient services. Coverage of inpatient services in psychiatric facilities is capped at 190 days per a beneficiary’s lifetime. Medicare does not cover such important service settings as crisis residential programs, therapeutic family or group treatment homes, and residential detoxification and substance abuse treatment centers. Medicare’s coverage of core mental health professionals is limited, reducing beneficiaries’ choice of provider and access to care. Medicare does not cover such important community-based services as psychiatric rehabilitation, intensive case management, and day treatment. The unfortunate result is that most Medicare beneficiaries in need of mental health treatment are not seen by a mental health specialist.

Your legislation helps address all of these issues, and its enactment would make a dramatic difference in the lives of Medicare beneficiaries with mental disorders. Research has given us an unprecedented arsenal of effective treatments for mental and emotional disorders. Today, mental illnesses are as treatable as other general medical conditions. These treatments must be made available. Policymakers must take action to end the discriminatory policies in place—in the Medicare program and elsewhere—which work against individuals with these disorders.

We commend you for your ongoing dedication to ensuring Americans have adequate access to effective mental health treatments, and we look forward to working with you to secure the ultimate enactment of these provisions affecting Medicare beneficiaries with mental health needs.

Sincerely,
